How do I create a data set that shows the variables that have collected data in the past 10 days?

- 1. To create a data set that shows what variables have collected data in the past 10 days:
In WinSPC's Administrator window, click the New Data Set toolbar button.
Name and double-click the data set that gets created.
In the Data Set Builder, click the Find all variables toolbar button to toggle it on and click the Find all parts toolbar button to toggle it off.
Click the Data Filter tool bar button.
In the Data Filter Setup window, on the Date Range tab, under Date Range Type, select N Days Ending.
In the Number of days text box that appears, enter 10.
Under Ending, leave Today selected.
Click OK.
Close the Data Set Builder, saving your data set as you do.
If desired, view the data set in a report or dashboard.
