

## **DataNet Quality Systems Knowledgebase**

**To view the CWR help file, an additional Windows component is necessary for Windows Vista or Windows 7**

If you are running Windows Vista or Windows 7, you must download an additional component from Microsoft in order to view the CWR help file. This component can be found from Microsoft's website here:

<http://support.microsoft.com/kb/917607>

In addition, you will also need to enable macros for the help file. To do this, follow the instructions in the section titled "How to enable macros on a single computer after you install the WinHlp32.exe download" in the link above.
