

Capability Report

- Current Report Version: 1.0.1

The capability report displays a variety of information about a specific variable on a single page, including statistics such as mean, standard deviation, Cpk, and Ppk. It also contains a histogram of the individuals data.

This report varies from the 'Capability Report' in the '\Legacy WinSPC Reports\' directory only by the header and footer information on the report.

The export of the report template can be found in the 'Attachments' section below, which can then be imported into your WinSPC system.

Report History:

Version 1.0.0 shipped with WinSPC 8.0.0 Version 1.0.1 shipped with WinSPC 8.1.0
